

To whom it may concern:

I have xm satellite radio, and I have loved it from the moment I have purchased it. It allows me to hear channels that my local area doesn't have. For years you have gotten by with forcing us to listen to your garbage. We pay our fairshare for these services, and if you don't like it tough. Instead of trying to ruin it for others, why don't you improve your crappy system of radio weather once every 20 minutes. Think about it. Keep XM going strong forever!!!

Sincerely,

XM Fan For Life
